

TAYLOR CHRISTIANSON

Lead Software Engineer | Unity & C#

SKILLS

Languages: C# • C++ • HLSL • HTML

Engines & Tools: Unity (URP/HDRP/6/Cloud) • Godot (Current Study) • Photon • iOS & Android

Software: Perforce • Cursor AI • Claude Code • Git • TeamCity • JetBrains Rider • Visual Studio

Specialties: Game & Systems Design • Procedural Generation • AI Systems • Editor Tooling • Rapid Prototyping • Profiling & Optimization • Agile/Scrum

EXPERIENCE

Lead Programmer/Project Lead - Halfbrick Studios

OCT 2021 - MAR 2026

- Pitched and prototyped 4+ projects. Two greenlit for full production cycles and two built and shipped as successful internal game jam titles.
- Architected a tactical turn-based roguelike in Unity 6 (Scraptics) from a one-week game jam prototype through three years of production to public beta on iOS and Android, owning the full systems stack including recursive algorithms, enemy AI, hex-grid turn management, roguelike progression architecture and more.
- Designed and implemented a modular behavior-based enemy AI system, enabling rapid prototyping of new enemy types across the team without engineering dependencies.
- Designed and maintained custom Unity editor tools that decoupled content creation from engineering, allowing designers to iterate on mechanics and balance without code changes.
- Directed cross-platform UI/UX, save systems, and Unity Cloud integration across iOS and Android builds, including live content updates throughout beta.

EDUCATION

Bachelor of Science in Game Development (B.S.) - Full Sail University, Winter Park,

NOV 2018 - JUN 2021

GAME JAMS

Sumo Fight (Unity 6, Photon)(iOS & Android) - 3D Multiplayer party game (Internal Halfbrick Game Jam)

2024

- Built and shipped a 3D multiplayer party game in one week as Lead Programmer.
- Engineered real-time player customization sync and core gameplay using Photon networking.

Survivors Aren't Dead (Unity 6)(iOS & Android) - Survivor-like action game (Internal Halfbrick Game Jam)

2023

- Pitched the concept, led the team, and delivered a fully playable survivor-like action game in one week. Owned core gameplay systems, enemy AI, and sound design from day one.

GAME PROJECTS (PRE-INDUSTRY)

To The Moon! (Unity, Photon)(PC) - 3D Multiplayer Space Shooter

FEB 2021 - JUN 2021

- Project Lead, Architected a comprehensive Photon networking stack to synchronize match management, weapon systems, and procedural map generation.
- Engineered high-performance AI ships utilizing steering behaviors and compute shaders.

Retrospectre (Unity & Web)(PC) - 2.5D metroidvania platformer

SEP 2019 - NOV 2019

- Engineered AI systems for 8+ distinct enemy types to create varied and challenging gameplay.
- Implemented responsive player controllers, weapon mechanics, and scalable interactable systems.

FAVORITE TITLES: Guild Wars • God Of War • Slay The Spire • Ratchet and Clank • Ghost of Tsushima

• Remnant • Backpack Hero • Pokémon Legends: Arceus • Returnal • Shadow Warrior • Titanfall 2 • Tenchu Z • Viva Piñata • Sly Cooper • Marvel Snap • Darkest Dungeon • Valheim • Helldivers 2
