

TAYLOR CHRISTIANSON

Senior Game Developer | Gameplay, Systems & Rapid Prototyping

PROFESSIONAL SUMMARY

- **Cross-disciplinary game developer and technical lead** specializing in gameplay, systems design, rapid prototyping, and taking ideas from concept to playable builds.
- **AI-native developer** experienced with Claude Code-first professional workflows, using AI to accelerate implementation, iteration, and cross-disciplinary ownership.

SKILLS

Game Development: Gameplay & Systems Design • Rapid Prototyping • Game AI • Multiplayer & Netcode • Procedural Generation • UI/UX • Editor Tooling • Profiling & Optimization • Tech Art

Engineering: C# • Unity 6 • Photon Fusion • HLSL • C++ • FMOD

AI & Tools: Claude Code • Cursor • AI-Assisted Development • Perforce • Git • TeamCity • Rider

Platforms: Steam / PC • iOS • Android • Web

EXPERIENCE

Senior Unity Developer & Lead Designer - Panda Paw Entertainment

MAR 2026 - SEP 2026

- Pitched, designed, and built **CatchUp Showdown**, a co-op multiplayer game of catch, from concept to a live Steam demo in two months using an AI-forward, Claude Code-first development workflow.
- **Cross discipline ownership**, including core gameplay, deterministic procedural levels, Photon Fusion networking, scoring/progression, UI, environment systems, shaders, editor tooling.
- **Built CatchUp's complete UI in ~2 weeks** using a generate-then-author workflow, generating and wiring the interface before hand-authoring its visual design and animation in Unity.
- Owned Guard AI, gadget systems, operator systems, and tooling for *Swipers*, including component-based AI, dual-zone vision, FMOD-driven hearing, and networked gameplay systems.

Lead Programmer/Project Lead - Halfbrick Studios

OCT 2021 - MAR 2026

- Took **Scraptics** from a one-week jam prototype through roughly three years of development to a beta with ~300 external players, owning gameplay systems, recursive puzzle algorithms, enemy AI, turn management, progression, UI/UX, and tooling.
- Designed a modular behavior-based enemy AI system that allowed the team to prototype new enemy types without engineering dependencies.
- Led a four-person team across technical direction, priorities, code reviews, mentoring, and full production lifecycle.
- Reworked mobile performance from **sub-20 FPS with device overheating to stable 60 FPS in four weeks**, identifying a runtime issue invisible to editor profiling through on-device investigation and improving rendering performance.

PROJECTS

Card Clash - Auto Battler (Next.js, React, TypeScript, Tailwind)(Web) - Personal web project, built solo

JAN 2026

- Built and shipped a complete playable web game from concept to live build in **three days**, using Cursor throughout development with no prior professional web-development background.

To The Moon! (Unity, Photon)(PC) - 3D Multiplayer Space Shooter

FEB 2021 - JUN 2021

- Project Lead. Architected the multiplayer stack - match management, weapons, and procedural map generation; engineered AI fighter ships using steering behaviors and compute shaders.

EDUCATION

Bachelor of Science in Game Development (B.S.) - Full Sail University, Winter Park, FL

NOV 2018 - JUN 2021

FAVORITE TITLES: Guild Wars • God Of War • Slay The Spire • Ratchet and Clank • Ghost of Tsushima • Remnant • Backpack Hero • Pokémon Legends: Arceus • Returnal • Shadow Warrior • Titanfall 2 • Tenchu Z • Viva Piñata • Sly Cooper • Marvel Snap • Satisfactory • Valheim • Helldivers 2
